**14:00 – 17:00**    **Seminar: Transforming risk to reward: avoiding catastrophic incidents and improving reliability**

This seminar is a must-attend session for executive leaders whose business is exposed to operational risks through manufacturing processes. It will highlight the importance of risk control, and offer first steps, practical case studies and valuable takeaways to make rapid, dramatic and sustainable improvement in performance.

**Session one: The importance of risk control**

This session will highlight why risk control is so critical for your business; including the potentially devastating impacts on your workforce, reputation, reliability, and bottom line. Given its importance, why is it that companies so frequently fall into the trap of believing their risks are under control only to have a catastrophic incident? Common blind spots and cultural shortcomings will be explored as well as emerging systematic risks.

Speakers:

**Mosaed Al-Ohali**, *EVP, Corporate Finance, SABIC*

**Detlef Kratz**, *SVP, Corporate Technology and Operational Excellence, BASF*

**Yasser Abdulrahim Alabbasi**, *Plants Operation Manager, GPIC*

## Session two: Best practices in risk control

What companies can do proactively. This session will address the importance of dynamic risk control that covers both the "soft" side – leadership, culture and organizational capability - and the "hard" side - operational processes and maintenance practices. Practical pointers will be shared to allow you to assess your organization's "Risk IQ" and help you ensure that your critical operational risks are under control.

Speakers:

**Matt Aguiar, Senior VP, Global Operations, ExxonMobil Chemical Company**

Facilitated by:

**14:30 – 17:30 Business networking and exhibition**

**19:30 – 22:30 Gala dinner**
